AUTHORIZATION FOR CARE

I hereby authorize the Doctor to work with my condition through the use of adjustments to my spine and any other care as he or she finds necessary. Should we need to refer for further care, we will guide you. I clearly understand and agree that all services rendered me are charged directly to me and that I am personally responsible for payment. I agree that I am responsible for all bills incurred at this office. I understand that if I suspend or terminate my care, any fees for professional services rendered me will become immediately due and payable.

I hereby authorize assignment of my insurance rights and benefits (if applicable) directly to the provider for services rendered. I understand and agree that health and accident insurance policies are an arrangement between an insurance carrier and myself. I understand that the Doctor's Office will prepare any necessary reports and forms to assist me in collecting from the insurance company and that any amount authorized to be paid directly to the Doctor's Office will be credited to my account on receipt.

NOTICE OF PRIVACY POLICY

Protecting the privacy of your personal health information is important to us. Disclosure of your protected health information without authorization is strictly limited to defined situations that include emergency care, quality assurance activities, public health, research, and law enforcement activities. Any other disclosures for the purposes of treatment, payment or practice operations will be made only after obtaining your consent.

- You may request restrictions on your disclosures.
- You may inspect and receive copies of your records within 30 days with a request.
- You may request to view changes to your records.
- In the future, we may contact you for appointment reminders, announcements, and to inform you about our practice and its staff.

I understand that, under the Health Insurance Portability & Accountability Act of 1996 (HIPAA), I have certain rights to privacy regarding my protected health information. I understand that this information can and will be used to:

- *Conduct, plan, and direct my treatment and follow up with multiple healthcare providers who may be involved in that treatment directly or indirectly.*
- *Obtain payment from third party payers.*
- *Conduct normal healthcare operations such as quality assessments and physician's certifications.*

I have read and understand your Notice of Privacy Practices. A more complete description can be requested. I also understand that I can request, in writing, that you restrict how my personal information is used and or disclosed.

Informed Consent to Care

You are the decision maker for your health care. Part of our role is to provide you with information to assist you in making informed choices. This process is often referred to as "informed consent" and involves your understanding and agreement regarding the care we recommend, the benefits and risks associated with the care, alternatives, and the potential effect on your health if you choose not to receive the care.

We may conduct some diagnostic or examination procedures if indicated. Any examinations or tests conducted will be carefully performed but may be uncomfortable. Chiropractic care centrally involves what is known as a chiropractic adjustment. There may be additional supportive procedures or recommendations as well. When providing an adjustment, we use our hands or an instrument to reposition anatomical structures, such as vertebrae. Potential benefits of an adjustment include restoring normal joint motion, reducing swelling and inflammation in a joint, reducing pain in the joint, and improving neurological functioning and overall well-being.

It is important that you understand, as with all health care approaches, results are not guaranteed, and there is no promise to cure. As with all types of health care interventions, there are some risks to care, including, but not limited to: muscle spasms, aggravating and/or temporary increase in symptoms, lack of improvement of symptoms.

With respect to strokes, there is a rare but serious condition known as an "arterial dissection" that typically is caused by a tear in the inner layer of the artery that may cause the development of a thrombus (clot) with the potential to lead to a stroke. The best available scientific evidence supports the understanding that chiropractic adjustment does not cause a dissection in a normal, healthy artery. Disease processes, genetic disorders, medications, and vessel abnormalities may cause an artery to be more susceptible to dissection. Strokes caused by arterial dissections have been associated with over 72 everyday activities such as sneezing, driving, and playing tennis.

Arterial dissections occur in 3-4 of every 100,000 people whether they are receiving health care or not. The reported association between chiropractic visits and stroke is exceedingly rare and is estimated to be related in one in one million to one in two million cervical adjustments. It is also important that you understand there are treatment options available for your condition other than chiropractic procedures. You have the right to a second opinion and to secure other opinions about your circumstances and health care as you see fit.

I have read, or have had read to me, the above consent. I understand that it is not possible to consider every possible complication to care. I have also had an opportunity to ask questions about its content, and by signing below, I agree with the current or future recommendation to receive chiropractic care as is deemed appropriate for my circumstance. I intend this consent to cover the entire course of care from all providers in this office for my present condition and for any future condition(s) for which I seek chiropractic care from this office.
